The area was the center of the city of Lancaster until 1967, when the city was amalgamated with Saint John. Proud west siders still say, “There is no side like the west side.”

The well-known Reversing Falls are located about 1 km from the centre of town on the city’s west side. At high tide the ocean waters surge upstream through a narrow chasm, reversing the rush of river water through the gorge at low tide. If your transport to the Legion takes you across the Reversing Falls bridge, look to your right. The best times to see the river flowing up river are 6:40 AM and 7:08 PM on 27 August 2024.
